APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office. JAN 2 1 1987			
Returned to applicant for correction			
Corrected application filed			
Map filed JAN 2 1 1987			
The applicantOld Galena, Ltd.			
P.O. Box 2903 Street and No. or P.O. Box No. City or Town			
Nevada 89505, hereby make application for permission to appropriate the publi			
waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation,			
tion; if a copartnership or association, give names of members.) Dean Smith, Rachael J. Smith,			
Don Ekins, Donn L. Wheeler, Ronald Osborn			
1. The source of the proposed appropriation is <u>Underground</u> Name of stream, lake, spring, underground or other source			
2. The amount of water applied for is			
(a) If stored in reservoir give number of acre-feet See "No. 12 Remarks"			
3. The water to be used for Fire Protection Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.			
4. If use is for:			
(a) Irrigation, state number of acres to be irrigated			
(b) Stockwater, state number and kinds of animals to be watered			
(c) Other use (describe fully under "No. 12, Remarks" See "No. 12 Remarks"			
(d) Power:			
(1) Horsepower developed			
(2) Point of return of water to stream			
5. The water is to be diverted from its source at the following point within the SW 1/4 of the SE 1/4 of Section 2, Township 17 North, Range Describe as being within a 40-acre subdivision of public process. W. D. D. R. M. S. C. R. S. M. D. R. M. S. C. R. S. W. D. R. M. S. C. R. S. W. S. S. W. S. C. R. S. W.			
survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated. 502 feet from the			
S 1/4 corner of said Section 2.			
6. Place of use Within the S 1/2 of the SE 1/4 of Section 2, Township 17 Describe by legal subdivision. If on unsurveyed land, it should be so stated.			
North, Range 19 East, M.D.B. & M.			

7. Use will begin about January 1 and end about December 31, of each year. Month and Day Month and Day

(PERMIT TERMS CONTINUED)

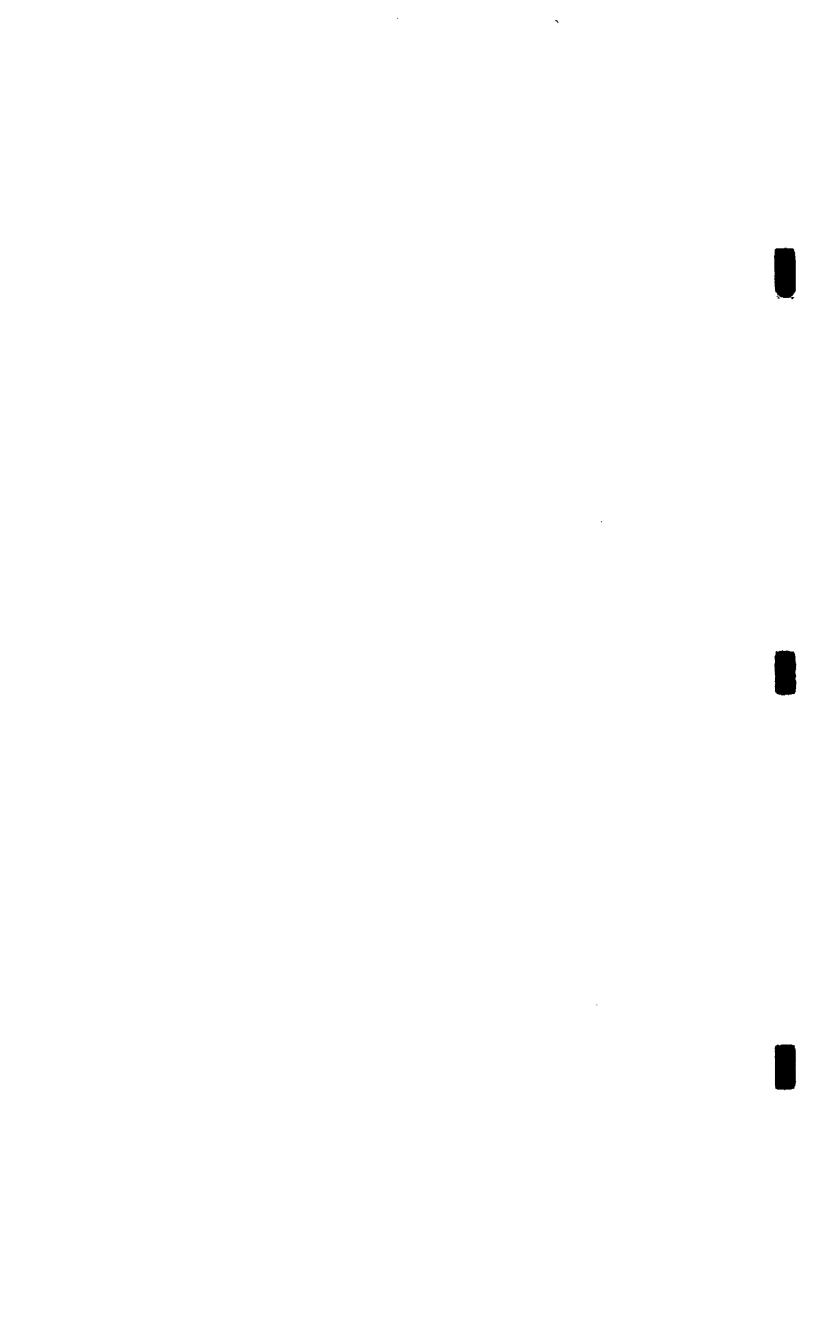

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use.

No perforations shall be put in the production casing from ground level to 100 feet.

This permit is issued for fire protection purposes only. No application to change the manner of use of this permit will be considered.

^

As mandated by the State of Nevada Division of Forestry, a groundwater source must be provided to maintain a constant water level in the firewater ponds when surface water sources are insufficient or nonexistant. This groundwater source will be used for fire protection purposes only and will be strictly supplemental to existing surface water rights (half of all water rights allowed under Claim No. 648, Truckee River Final Decree in the amount of 0.25 cfs not to exceed 45 acre feet per year) dedicated to Washoe County which are to remain available to support the irrigation, landscaping and fire protection use for water for the subdivision. Currently there are 10 lots under development with two 10,000 gallon (minimum) firewater storage reservoirs. Ultimately there will be 36 lots with a total of six 10,000 gallon firewater storage reservoirs for a total storage of approximately 0.20 acre feet. The amount of water applied for takes into consideration evaporative losses of approximately 3.33 feet (40 inches) per year over a reservoir surface area of 1,200 square feet.

The diversion rate applied for (1.0 cfs) does not relate to the actual anticipated annual duty but provides for filling of the firewater storage reservoirs within a reasonable period of time. Example calculations of duty and diversion are as follows:

- (1) Annual Duty
 - (A) Evaporation Assumptions:
- (a) Annual lake evaporation is 40 inches per year.
- (b) Reservoirs and ditches are lined.
- (3.33 ft/yr)(1200 ft²/res)(6 res)(acre/43,560 ft²) = 0.550 acre-feet/year
- (B) Fire Protection

Assumptions:

- (a) Two residential fires occur in one year
- (b) Fire flows are approximately 1000 gpm for a two hour duration.

(1000 gal/min)(120 min/fire)(2 fires/yr)(ft³/7.48 gal) (acre/43,560 ft²)

= 0.737 acre-feet/year

Total Annual Duty = 0.550 + 0.737 = 1.287 acre-feet/year

(2) Diversion Rate (annualized)
